ATTENTION ALL
PARENTS AND TEACHERS!

Order your CSI Kit with Hands-on Training

It’s no secret that learning is enhanced by doing, and life experiences are the best teaching tools. Students will hear first-hand of true forensic investigations while performing authentic procedures at home or in school. Using the tools in their kit, students are guided step by step through evidence examination and scientific techniques during our sessions. Parents may even want to get in on the action themselves!

Each PRIME SUSPECT kit is used with FIVE ONLINE SESSIONS focused on fingerprints, blood identification, pattern interpretation, anthropology, pathology and more.
