

boundrees™

An  Technology Company

A privacy first digital safety app for families navigating a connected world.

The Problem: Kids are connected and exposed

- Mental Health Issues
- Cyberbullying Epidemic
- Teen Dating Violence
- Risky Online Behavior
- Parents Can't Keep Up

Our Solution

Machine Learning-Based Risk Detection

- Monitors ALL social media, texts, and gaming chats
- Detects cyberbullying, grooming, self-harm, & more
- Context-aware AI reduces false alarms

Data-Privacy Conscious Alerts

- Flags potential dangers without transmitting data across a network
- Protects kids' data
- Kids retain privacy, while staying protected

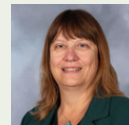

Real-Time Intervention

Why Us?

Priorproprietary algorithm, runs on the phone, 1M labeled records.

- Detects dangerous communication with over 90% accuracy.
- Data is not stored on our servers - content monitoring and alert system runs entirely on the child device, transmitting data only when an alert is detected.
- Monitors all apps, not just the popular ones. In our NSF-funded study 100 kids used over 900 apps.
- Easy installation and use.
- No VPN, no battery drain.
